

Success depends on proper utilisation of human resources

HR Eternity

HR eternity is human resource management system aimed at easing the work of HR and management in having control and administration over the employees and employee based information. This works on the principle of SAAS (Software as a Service). It caters and fulfills the needs of HR departments of organizations belonging to various industries. Usually the HR modules are integrated along with enterprise solution, but due to the competitive pressure and increase in demand, this is now segregated as a solitary module

Features
